

Protect Your Family And The Environment By Choosing A Tablet System!

A single gallon of household bleach contains over one and a half pounds of salt. This amount will have a devastating effect on your lawn, trees and shrubs.

BIO-DYNAMIC® TABLET FEEDER SYSTEM

- Little to no maintenance required
- No electrical components
- Easy to install
- 10 year comprehensive warranty
- Accurate, dependable and precise dosing

Use Norweco's Bio-Dynamic® Tablet Feeders in conjunction with our Blue Crystal® chlorine tablets for ultimate performance and results.

LIQUID SYSTEMS

- Frequent maintenance required
- Use of electricity
- Moving parts are expensive to replace
- Liquid chlorine is corrosive to pumps
- Manual adjustment for chemical dose

KNOW THE FACTS! Norweco Can Help!

If you are using a liquid disinfection system, consider these facts:

CALCIUM HYPOCHLORITE TABLETS

- Contains 70% available chlorine (exceeds NSF standards)
- 1 year shelf life
- Automatically adjusts chemical dose
- Environmentally safe
- Provides up to 10 or more days of treatment

HOUSEHOLD BLEACH

- Only contains 5% available chlorine (NSF requires 6% for proper disinfection)
- Loses half of its potency in less than 30 days
- Provides inaccurate and inconsistent dosing
- High concentration of zinc, copper and iron
- Requires refill with fresh products every 6 days
