## **CONTROL YOUR DESTINY PARTNER WITH NORWECO ONSITE WASTEWATER TREATMENT**

### **SINGULAIR<sup>®</sup>**

### **SINGULAIR GREEN<sup>®</sup>**

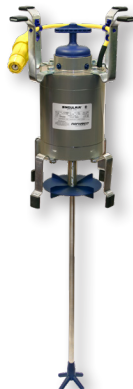

## **EXCLUSIVE DISTRIBUTORSHIP OPPORTUNITY LIMITED AVAILABILITY**

- OSSF treatment process contained in one TCEQ approved system
- Simple installation, operation and service
- Save time and increase profit margins
- Built-in pretreatment requires less pumping than competitive units

### **MODEL 206C AERATOR**

The Singulair aerator is a trouble-free, energy-efficient air delivery device that is inexpensive to operate. The system has been performance certified with the aerator operating only 30 minutes per hour. Intermittent operation results in direct savings in electrical costs and longer aerator life. The aerator is the only electrical component and provides complete aeration while eliminating offensive odors.

- High quality products always in stock and backed by premium service
- Available in five sizes for any application
- Designed and certified to meet state and county regulations
- Affordable and effective wastewater treatment

### **BIO-KINETIC SYSTEM**

The non-mechanical, demand-use Bio-Kinetic system is the tertiary treatment and disinfection device. The system includes built-in flow equalization that controls peak hydraulic flow conditions. Complete treatment and disinfection are assured while minimizing chlorine usage. The updated design of the Bio-Kinetic system allows for fast & easy service.
